EXPERIENCE

Heycar, Berlin — Senior *Frontend Engineer*

FEBRUARY 2023 - Present

Write production-ready clean code, ensure the testing pyramid is followed, and Consistently design code aligned with the overall service architecture, and mentor junior engineers.

Construyo, Berlin — Senior Fullstack *Software Engineer*

APRIL 2021 - AUGUST 2022

I work closely with the engineering lead to discuss the project roadmap. I refactored our mono repo/project into microservices. Extract commonly used components into React UI library. I was mentoring junior engineers.

LevelTen Energy, Washington — *Full Stack Software Engineer*

FEBRUARY 2020 - MARCH 2021

I worked on redesigning the UI and building APIs to integrate European markets into LevelTen platforms and resolve existing bugs.

Sondermind, Denver — *Frontend Engineer*

JULY 2019 - JANUARY 2020

I worked as an Angular frontend engineer building the new interactive payment process UI that powers invoicing, installment payment, virtual card management, and payment with Stripe API and Insurance plan.

Andela, Nigeria —*Full Stack Software Engineer*

SEPTEMBER 2018 - SEPTEMBER 2020

I worked as a full-stack engineer in a remote distributed team to build Andela's in-house Cab booking Slack bot and web application. I also worked with Andela Partners as an integral part of their tech team to create innovative solutions.

Glosskode Technology Solution, Nigeria —*Full Stack Software Engineer*

JANUARY 2018 - JULY 2018

I built a fintech pension application that helps pension owners carry out banking transactions like fund transfers and utility bill transactions in the comfort of their homes.
